Thanks for the info; at some point I'm sure we'll need all the lab capacity we can get

Mace Barron asked me to forward this to you in case you did not already have it. It is a tox lab we have used for past programs. Whole sediments and water testing.

John, could you send bioassay lab info to John and Althea asap?
should have thought of you!

John called me and asked for assistance, specifically: if we could support the ecotox testing and he would also like the list of ORD capabilities and equipment.

I told John that we could provide advice and review on ecotox, but not testing, and that you would be able to inform him on the capabilities/equipment list status and whereabouts. I suggested John check with his regional NPDES folks because they likely know what labs have been used to support marine discharge permits.

sincerely,
Mace
